1. Executive Overview

After establishing the general plan and basic setup for this project, this document will go beyond the surface-level details mentioned in the previous document. This second deliverable will contain information about the client's business and will be discussed in greater detail; things such as the business domain and its environment. It also mentions what is the initial business problem that the client is having with their business and how the team aims to solve their issue in a much more elaborate way. Client contact will be up to only one teammate to create a questionnaire and gather the necessary data in order to understand the client's problem with better meaning. Additionally, the team will create an appendix of user stories covering numerous scenarios and represent them on a story map that includes the list of these user stories. Overall, with these details, the team can get a clearer view of what to do for the client and share/look back at what we've done and what needs to be done.

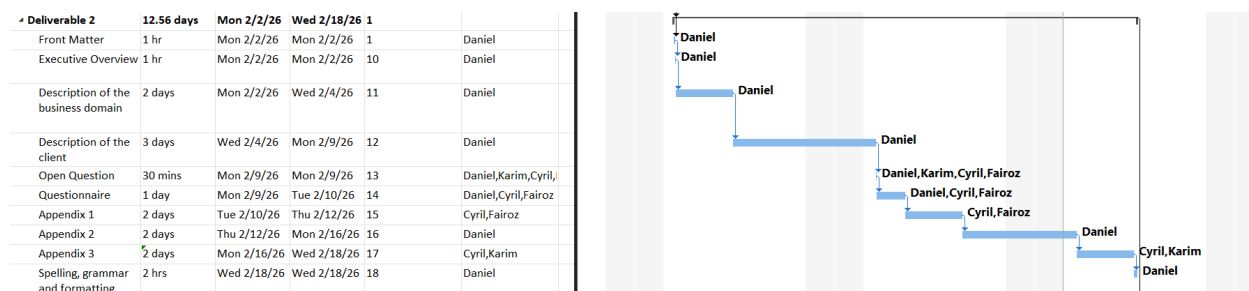

2. Business Domain

The client is a business-to-consumer (B2C) company that hosts events in three different reception halls: The Princess, The Royal, and The Grand Salon. By choosing the number of guests, meal menus, entertainment, bar services, and extras like caterers, buffets, or sweet tables, customers can personalize their experience hosting a range of events, including weddings, parties, and celebrations. Both clients and business owners may find it time-consuming that a large amount of the booking and consulting process is currently done in person. Excel spreadsheets and paper documents are used for administrative duties, including recording reservations, contracts, and invoicing, which raises the possibility of errors, inefficiencies, and duplication of effort. Through Facebook, Instagram, and a simple website, the company keeps up an online presence that aids in increasing local awareness and brand recognition. Even if it competes with neighbouring establishments like Le Rizz and Château Classique, the client continues to be one of Rivière-des-Prairies' (RDP) most well-liked and well-regarded reception halls. Renovations and enhancements to the quality of the cuisine and service have contributed significantly to the business's 34–35% growth over the last three years.

3. Client Description

Tony and Pat, who have been in the reception hall and event venue business for more than 30 years, own and run the company. They have developed a solid name and a devoted clientele thanks to their wealth of knowledge. They want solutions that are straightforward, understandable, and useful, and that do not interfere with their current workflow, even though they are at ease using simple computer tools and following directions.

4. Project Plan

5. Business Problem

The inefficiency of the present booking procedure, which is exclusively done in person, has been recognized as the main business issue. In order to collect fundamental information like event dates, guest counts, food preferences, and budget, this process necessitates several contacts with potential clients. As a result, a considerable amount of time is spent by both employees and clients repeating the same procedures and responding to identical inquiries. Remarkably, the product owner was the one who first recognized this problem and brought it up to the customers. Following a discussion, the clients acknowledged that, especially as their firm grows, their present system should be enhanced. The company runs the risk of experiencing longer response times, administrative overburden, and trouble growing operations in the future if client information is not gathered and managed in a more organized and centralized manner.

6. The Questionnaire

1. What is the current booking process?

Clients book an appointment to see the halls and ask questions. The owner then suggests different options to them, and if they agree, a contract is signed.

2. How comfortable are you with computers and technology?

Tony is comfortable with working with computers as long as he has instructions he can follow

3. Is there an existing database, or are the records kept on paper?

There are physical copies and Excel spreadsheets of the invoices, but no records of client contact are kept, except in the contracts.

4. Do you own a server of some sort? (Cloud/physical?)

There's a cloud server (the owner's not sure).

5. What is every room's min/max capacity?

The smallest hall, Princess Hall, has a size of 1000 sqft, with a maximum of 50 guests allowed

The medium hall, Royal Hall, has a size of 4000 sqft, with a guest capacity of 50-125

The largest hall, Grand Hall, has a size of 6000 sqft, with a guest capacity of 125-225

6. How many rooms are available?

3: the smallest (Princess), medium (Royal), and the largest (Grand)

7. Does the company provide any services/amenities (catering, decorations, etc)?

The company provides catering services and can redirect clients to third-party sources for other services, such as decorations.

8. What kind of events are allowed in the halls?

- Weddings
- Birthdays

- New Years
- Valentines day
- Christmas
- Easter
- Baptisms
- Communion
- Confirmations
- Association parties (business parties)

9. How long can a hall be booked + price?

Halls are usually booked for a day; the price depends on the menu the client chooses.

10. What are the sizes of the halls?

Princess: 1000 sqft

Royal: 4000 sqft

Grand: 6000 sqft

11. What are the rules/policies? Must adults be with minors?

Children are allowed in the hall AS LONG as the guest who organized the event allows it

12. Are there any additional fees/services that aren't included in the main "package"?

Tony says they provide any services based on what the guests ask. This includes handing containers to bring food home. For decorations, they use 3rd party services.

13. Are there pre-made or pre-organized halls (template)?

There are menus available based on guest size.

14. Is there a confirmation/selection process on your side?

Contracts are signed when the client visits the company and discusses the event's details.

15. How fierce is your competition with other halls in the area?

Tony said that the business has tough competition, especially with other competitors such as Le Ritz, Roma, etc. Sometimes they would visit them to get more insight into what to improve

16. Is the hall gaining or losing business? Or is it staying constant?

According to Tony, business has gone up thanks to recent renovations to the venue and the food. He also estimates an increase of 30%-40%.

17. How does your client pay for the venue?

The client pays based on the menu. However, the cost of the food stays the same no matter the number of guests

The client pays with cheque, stash, e-transfer, debit, etc. However, they do not accept credit cards

18. What is necessary to book? (Name, address)?

The date, year, number of guests, and budget.

19. How are payments processed?

Payments can be made with cash, e-transfer, debit, or cheques. Credit card payments are not accepted.

20. When are payments due (before or after the event)?

A 10% deposit is due when the contract is signed; the rest can be paid in segments until the event's date.

7. Appendix 1

Backlog items
As an owner, I want to be able to know the number of people present at my customer's event so I can assign them a ballroom that will fit the amount of people attending..
As an owner, I want to know what decorations our customers want for their event so that I can contact them and collaborate with them to make sure my customers can have the decor needed for their event..
As a client I want to know what is offered as a menu/food at my party so that I can provide a generic price that my client's can expect. • Basic? • Buffet? • Catering? • Entrée? • Salad? • Main Dish? • Sweet Table? • Allergies?
As a client, I want to be able to book my event with a date and time so that I can give the owners time and a heads up to organize what I need for my party.
As an owner, I need to know what kind of entertainment will be present at the event so that I can contact the necessary entertainment companies that have been requested to entertain at an event at my reception hall. • What DJ? • Live band?
As a client, I want to know if there is bar service. • Is it paid? • Is it free? • When does it open? • When does it close?
As a client, I want to see what each ballroom looks like so I can get a feel for how big each ballroom is when I have my event.
As the owner, I want to only know the client in person after they provide what they want for their party online so that I can make sure they get the best experience and get to know them on a personal level.
As a client, I want to know the availability of dates before booking my event so that I can plan everything accordingly for my guests and I.
As a client, I want to see some frequently asked questions from past users so that any concerns I may have can already be answered without asking anything.

As the owner, I want to be able to track the status when a client has booked an appointment, when it happens and when I can discard their contact information.

As a client, I would like to choose the layout of my party with a user-friendly interface so that I can tell the owners how to set up my party without the need to come in person and explain how I want the layout to be organized.

- Choose orientation of the tables

As a client, I would like to observe reviews from previous customers about the venue so that I can know if I'm choosing the right venue for my event.

As a client, I would like to know how and when I can pay the owners for hosting my event so I can provide income for the reception hall in a timely manner and to make sure that it stays in business for the foreseeable future.

As a client, I would like to know if I can pay in installments after I have had my event hosted so that I don't have to pay in full if I don't have the necessary funds for such things at the moment.

8. Appendix 2

Feature: Easy and Intuitive Navigation

Scenario: Client can navigate to the main sections from the homepage

Given a client is on the homepage

When they click on, for example, the 'Services' link

Then they will be directly taken to the 'Services' page

Feature: Knowing the client better

Scenario: Clients can have in person meetings with the owners if necessary

Given the client wants to know more about what the hall actually looks like beyond pictures.

When a client comes in to see the venue in person after providing the essential information about their event online, they get a bigger picture of where their event is going to be hosted.

Then the owners benefit from these meetings because they get to see their customers face to face before the event and get to "know them better".

Feature: Content Clarity

Scenario: Client can find all necessary information without searching

Given a client is on the 'Ballrooms' page

When they click on a hall

Then the hall details, capacity and pricing are clearly displayed

Scenario: Client sees helpful messages for incomplete form fields

Given a client is on the 'Booking' page

When they leave a required field empty and submit the form

Then a clear error message indicates which field needs attention

Feature: Online Booking

Scenario: Client successfully schedules an appointment to finalize the booking process

Given a client visits the company's website

And they've selected a hall

When they click the 'Book' button

And they will fill out the necessary information

Then the client will receive a confirmation email

Feature: Menu and Pricing Viewing

Scenario: Client views menu details and available services

Given a client is on the 'Services' page

When they click on a menu package

Then the menu description and pricing will be displayed

Feature: Hall Availability

Scenario: Client views available halls

Given a client is on the 'Ballrooms' page

When they click on a hall

Then the hall's size, layout, and images will be displayed

And when they select the hall for their event

When they click the 'Book' button

Then they will be redirected to the 'Booking' page

Feature: Appointment Availability Calendar

Scenario: Client views available appointment time slots

Given a client is on the 'Booking' page

When they select an appointment date

Then the available time slots are displayed

Feature: Hall Availability Calendar

Scenario: Client views available dates for a hall
Given a client is on the 'Booking' page
When they click the 'Pick a date' button
Then the available and unavailable event dates will be displayed

Feature: Frequently Asked Questions

Scenario: Client views frequently asked questions
Given a client is on the company's website
When they navigate to the FAQ section
Then a list of common questions and their answers will be displayed

Feature: Client Reviews

Scenario: Client views existing reviews for a hall
Given a client is on the 'Ballrooms' page
And they click on a hall
When they navigate to the reviews section
Then all existing reviews will be displayed

Feature: Client Status Table

Scenario: Owner views all client statuses
Given the owner is logged into the system
When they navigate to the 'Clients Status' page
Then a table displaying all clients and their booking statuses is shown

Scenario: Owner sees updated status in real-time
Given the owner is viewing the 'Client Status' page
When a client completes a booking or updates their form
Then the corresponding client status in the table is updated automatically

Scenario: Client is removed from the status table when their booking is declined
Given the owner is viewing the 'Client Status' table
When a client's booking status is updated to 'Declined'
Then the client is no longer displayed in the status table

Feature: Search and Filter Clients

Scenario: Owner searches for a client by name
Given the owner is on the 'Client Status' page
When they enter a client's name in the search bar
Then only clients matching that name are displayed in the table

Scenario: Owner filters clients
Given the owner is on the 'Client Status' page
When they select a filter (e.g. status, event type, date, etc.)
Then only clients matching that filter are displayed

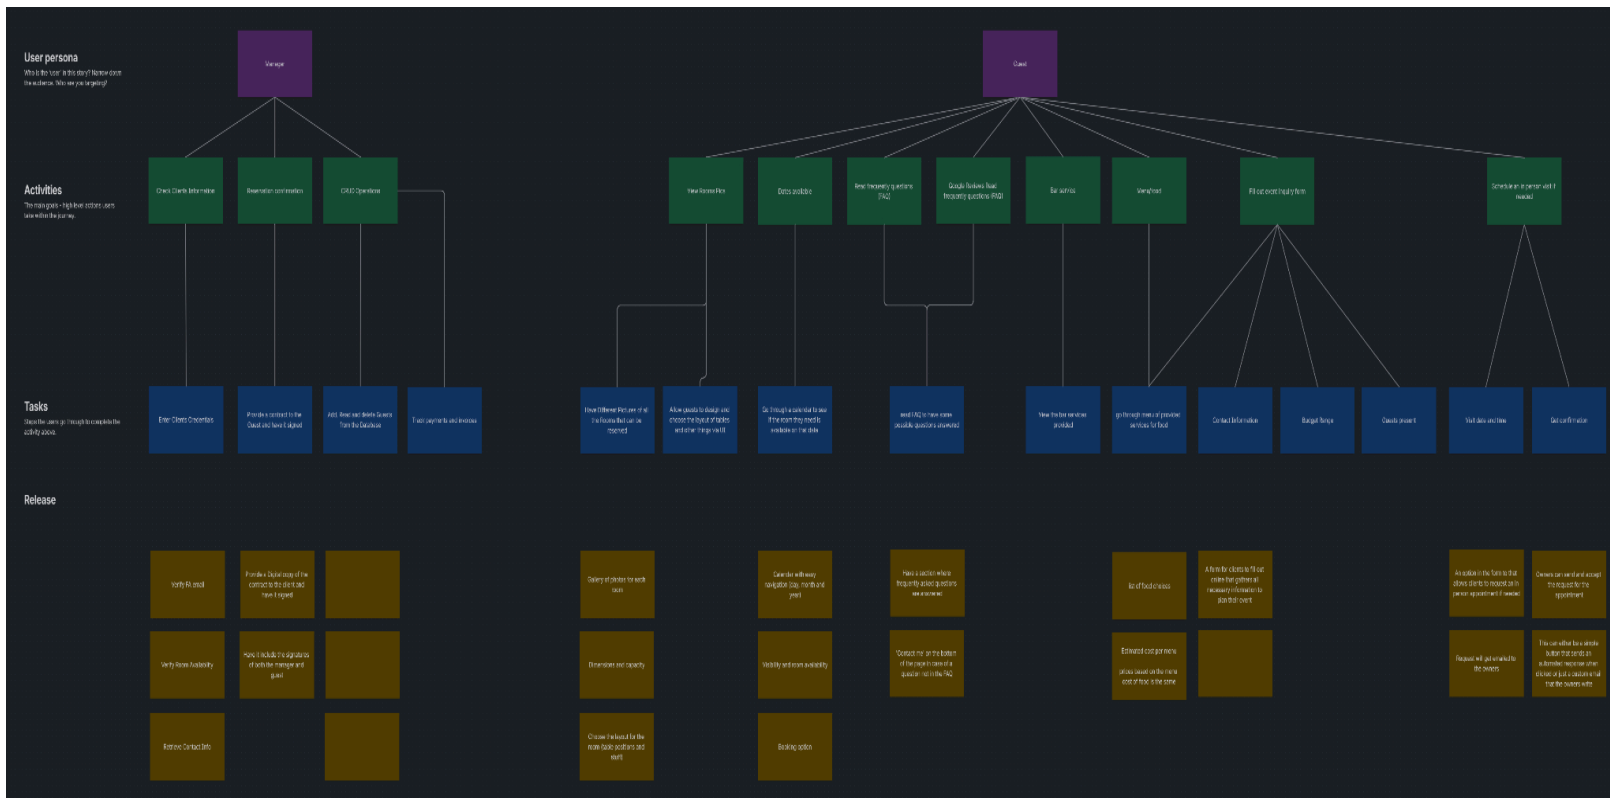

Feature: Client Form for Owner

Scenario: Owner views client-submitted information
Given the owner is logged into the system
When they open a client's booking record
Then all client-submitted details, including additional comments, are displayed

Feature: Bar Service?

Scenario: The client is letting the owners know if they want bar service at their event.
Given the client wants to have bar service, they can fill out a check box on the form, and then specify what time they want it to open and close. If not there is no bar service.
When they give the okay for bar service, the bar can be paid (meaning the guests at the event pay out of their own pocket for drinks) or it can be free (meaning the the customers who are the owners of the party pay for everyone to have as many drinks as they want before the party happens).
Then when the client fills out the rest of the form, they submit their request for bar service along with all the other necessary information for their party.

9. Appendix 3

10. Logbook

Meeting Number	Participants	What was discussed?	Where?	Work done	Duration (date and minutes)
1	Cyril, Daniel, Fairoz, Karim	- Reviewed what was done in deliverable 1	D-243	- Presented deliverable 1 - Completed executive overview	Monday, February 2, 2026 180 minutes
2	Cyril, Daniel, Fairoz, Karim	- What questions need to be asked about the client? - When will we be meeting with the client?	D-244	- Questionnaires and a meeting with the client were established - Business domain completed	Tuesday, February 3, 2026 120 minutes
3	Daniel, Karim	- How should the agenda look?	Discord	- Decided it was best to be done in class since we could get help	Tuesday, February 3, 2026 10 minutes
4	Daniel, Karim	- What needs to be on the agenda?	D-241	- Agenda done - Sent agenda to client - Questions finalized	Wednesday, February 4, 2026 120 minutes
5	Cyril, Daniel, Fairoz, Karim	- Had a meeting with the client via Google Meet - Discussed crucial topics such as how payment is done, competition, how booking works, technologies, services, policies, and how the business is doing.	Google Meet	- The team understood the client better and how his business works - Data to finish deliverable 2 acquired	Friday, February 6, 2026 26 minutes
6	Cyril, Daniel, Fairoz	- Discussed possible implementations for the project - Asked the client, "What are some frequently asked questions?"	D-244	- Backlog items - Questionnaire answers written down	Tuesday, February 10, 2026 105 minutes
7	Cyril, Daniel, Fairoz,	- Organize backlog - How to set up a	D-241	- Jira scrum workspace is set	Wednesday, February 11, 2026

	Karim	story map - Getting everyone set up on Jira		- Backlog organized and is less general	90 minutes
--	-------	---	--	--	------------
