1.Executive Overview

The business problem remains the same as previously identified: the inefficiency and lack of structure in the current booking process. At present, all bookings are handled exclusively in person, requiring multiple interactions to collect essential information such as event dates, guest numbers, menu preferences, and budget details. This repetitive and manual approach leads to wasted time, duplicated efforts, and increased administrative workload for both staff and clients. As the company continues to grow, this process becomes more difficult to manage, potentially resulting in slower response times and reduced operational efficiency. Without a centralized and organized system for capturing and managing client information, the business may struggle to scale effectively and maintain a high level of customer satisfaction.

2. Summary description

Tony and Pat, who have been in the reception hall and event venue business for more than 30 years, own and run the company. They have developed a solid name and a devoted clientele thanks to their wealth of knowledge. They want solutions that are straightforward, understandable, and useful, and that do not interfere with their current workflow, even though they are at ease using simple computer tools and following directions.

3. Business problem

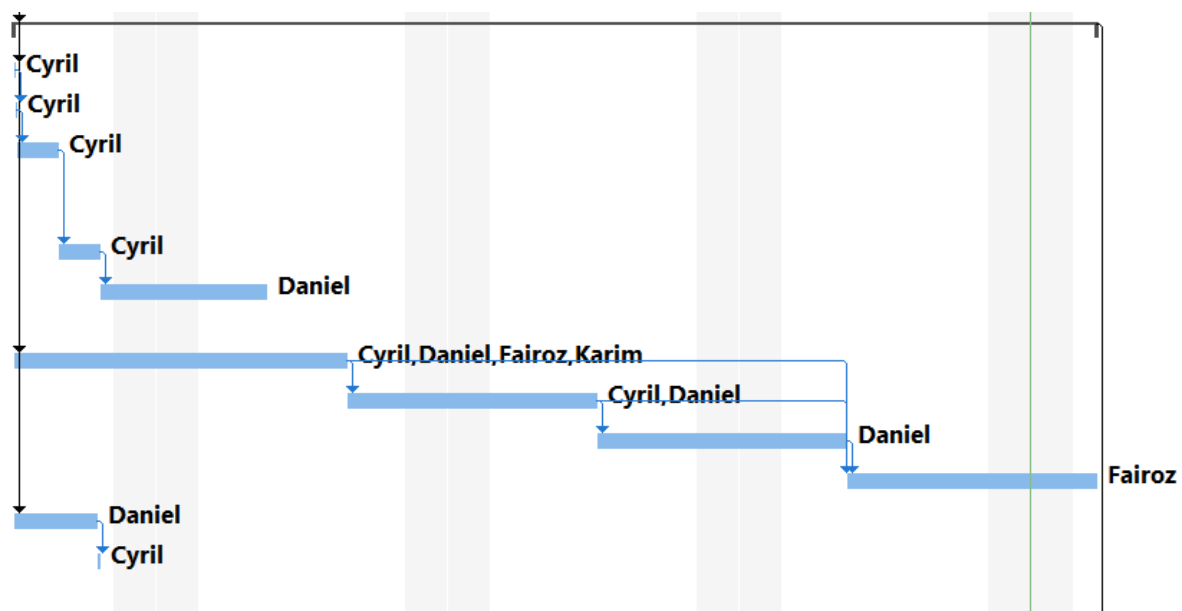

The inefficiency of the present booking procedure, which is exclusively done in person, has been recognized as the main business issue. In order to collect fundamental information like event dates, guest counts, food preferences, and budget, this process necessitates several contacts with potential clients. As a result, a considerable amount of time is spent by both employees and clients repeating the same procedures and responding to identical inquiries. Remarkably, the product owner was the one who first recognized this problem and brought it up to the customers. Following a discussion, the clients acknowledged that, especially as their firm grows, their present system should be enhanced. The company runs the risk of experiencing longer response times, administrative overburden, and trouble growing operations in the future if client information is not gathered and managed in a more organized and centralized manner.

4. Narrative description

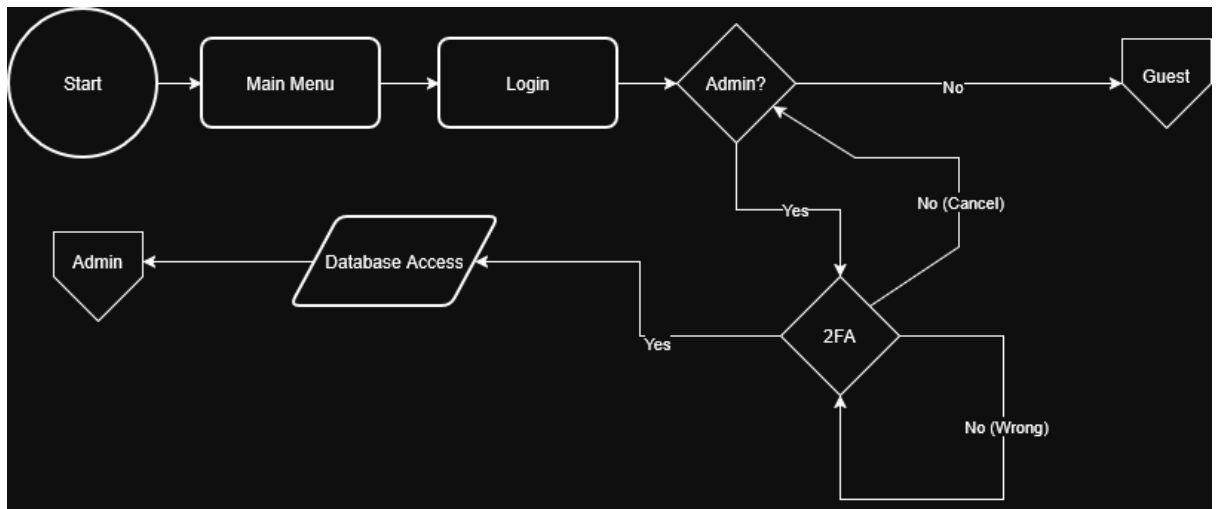

At the wedding venue, customers can come in person, sit down and talk to one of the owners about how they want to plan their event. The customers can either schedule an appointment via email or over the phone, via the <https://www.weddingwire.ca> website, or can just walk in like that (rare). During the meeting the owner and customer discuss important details such as the date, time, quantity, menu, etc. of their event. Then both of the owners look at the contract that was filled out during the meeting and plan for the event accordingly (usually having a timeframe of about 2-6 months). They need to take into consideration what food is needed for the event, the seating arrangements, what's going on with the whole bar situation, and many other variables to take into consideration. This is all just for one party and can become quite hectic since they have so many other clients to track and manage. So there must be a better way to relieve the weight off the shoulders of the owners and give them a much easier and structured way of managing, tracking and planning for their customers.

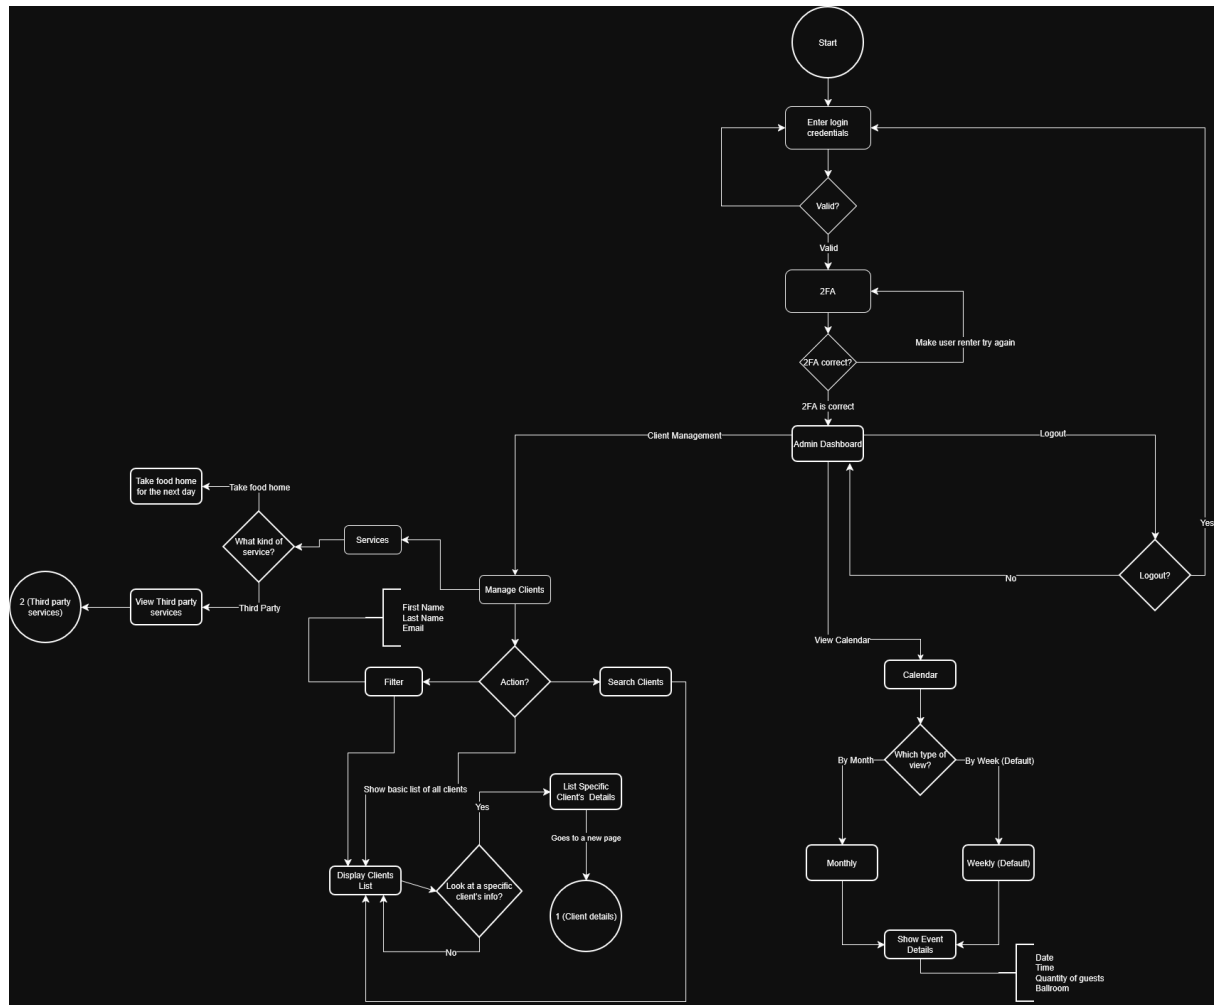

Project Plan

10. Agenda

1st Meeting

Date: February 16th 2026

Time: 8:30 - 11:30 AM (60 minutes)

Location: D-243

Members present: Cyril, Daniel, Fairoz, Karim

Purpose

- Present our Deliverable 2
- Begin Deliverable 3

Discussion Topics

- Finalizing the Deliverable 2
- Started preparing the 3rd Deliverable

Minutes

- Deliverable 2 was presented
- Daniel and Karim started finalizing the 2nd Deliverable
- Fairoz started researching on flowcharts
- Cyril started the document for Deliverable 3

2nd Meeting

Date: February 17th 2026

Time: 10:00 AM - 12:00 AM (60 minutes)

Members present: Fairoz, Cyril, Daniel, Karim

Location: D-244

Purpose

- Start planning the website using a flowchart

Discussion Topics

- Flowchart brainstorming

Minutes

- Alex showed us how to properly use flowcharts to plan our project
- Cyril, Fairoz, Daniel and Karim started drawing on the whiteboard to plan out the website
- Alex checked the flowchart to see if the team is on the right path
- At the end of class, Cyril, Fairoz, and Karim took pictures of the whiteboard

3rd Meeting

Date: February 23th 2026

Time: 8:30 - 11:30 AM (60 minutes)

Location: D-243

Members present: Cyril, Daniel, Fairoz

Purpose

- Present our current flowchart
- Learn about UML Diagram

Discussion Topics

- Discussed on revising the admin flowchart

Minutes

- Talked about what more to add to the flowchart
- Showed Alex our flowchart and he gave us some criticism
- Tried reevaluating the flowchart

4th Meeting

Date: February 24th 2026

Time: 10:00 AM - 12:00 AM (60 minutes)

Members present: Cyril, Daniel

Location: D-244

Purpose

- Revising the flowchart

Discussion Topics

- Cyril and Daniel were brainstorming on the flowchart

Minutes

- Alex is reexplaining the use case uml to the other section
- We had Alex check our flowchart once more

5th Meeting

Date: 2nd March 2026

Time: 8:30 - 11:30 AM (60 minutes)

Location: D-243

Members present: Cyril, Daniel, Fairoz

Purpose

- Learn about the class diagram
- Discuss how our class diagram should look like

Discussion Topics

-

Minutes

- Talked about what should be inside the class diagram
- Verified with alex about the flowchart
